### **Non-Final Office Action**

Claims 9-20 are pending. The claims are examined to the extent where permethrin and imidacloprid are the claimed pyrethroid and chloronicotinyl, respectively. No claim is allowed.

### **The Amendments**

The amendments filed on December 22, 2004 are drawn to non-elected invention (Claims 9 and 10 read "...comprising a pyrethroid and a chloronicotinyl compound."). This was restricted in a prior Office Action to a specific pyrethroid and chloronicotinyl: permethrin and imidacloprid, respectively. The now-cancelled claim 1 was drawn to these two specific compounds.

It has been established by the Board that a single species is seldom, if ever, sufficient to support a generic claim. In re Shokal, 242 F.2d 771, \_\_\_, 113 U.S.P.Q. 283, 285 (C.C.P.A. 1957). See also, In re Grimme, 274 F.2d 949, \_\_\_, 124 U.S.P.Q. 499, 501 (C.C.P.A. 1960) (the naming of a member of a genus or subgenus is not a proper basis for claiming the whole group).

Objective evidence of nonobviousness must be commensurate in scope with the scope of the claims. In re Tiffin, 171 USPQ 294. A showing limited to a single species can hardly be considered probative of the invention's nonobviousness in view of the breadth of the claims.

### **The Dorn et al. rejection**

This rejection is withdrawn because the Applicants have amended the claims. They have cancelled "insects" from their process claims and cancelled the composition claims altogether. Now, the claims are drawn to treating a mammal infected with acarids.

### **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 9-20 provisionally rejected under the judicially created doctrine of double patenting over claims 4-7 of copending Application No. 10/682127 (Hereinafter SIRINYAN et al). This is a provisional double patenting rejection since the conflicting claims have not yet been patented. These applications share a common assignee.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application

Art Unit: 1616

since the referenced copending application and the instant application are claiming common subject matter, as follows: SIRINYAN et al is drawn to skin-friendly dermally applicable liquid formulations comprising permethrin and imidacloprid for the method of controlling fleas and/or ticks on "warm-blooded animals." The presently claimed invention is drawn to a process for treating a mammal infected with acarids (fleas or mites) comprising dermally administering to the mammal an effective amount of a composition comprising permethrin and imidacloprid.

It would have been obvious to one skilled in the art at the time of invention because warm-blooded animals, as in SIRINYAN et al, is the same as mammals, as in the presently claimed invention.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
